

SPRINT PLANNING

AIM:

To assign user story to specific sprint for the project.

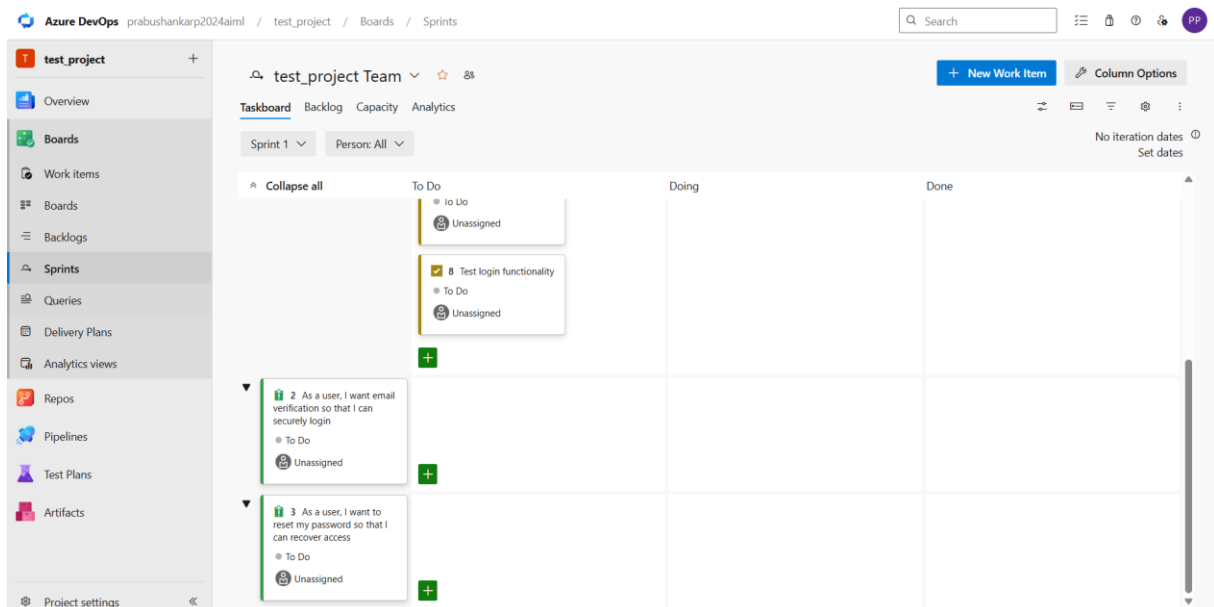

SPRINT PLANNING

SPRINT 1:

The screenshot shows the Azure DevOps interface for a project named 'test_project'. The left sidebar contains navigation links: Overview, Boards, Work items, Backlogs, Sprints (selected), Queries, Delivery Plans, Analytics views, Repos, Pipelines, Test Plans, and Artifacts. The main area displays the 'test_project Team' Sprints board for 'Sprint 1'. The board is organized into four columns: 'To Do', 'Doing', and 'Done'. The 'To Do' column contains a list of user stories, each with a checkbox and an 'Unassigned' status. The user stories are: 1. As a user, I want login functionality so that I can access my account securely. (Unassigned), 5. Design login page UI (To Do, Unassigned), 4. small work item (To Do, Unassigned), 6. Create login API (To Do, Unassigned), 7. Validate username and password (To Do, Unassigned), and 8. Test login functionality (To Do, Unassigned). The 'Doing' and 'Done' columns are currently empty. The top right of the interface includes a search bar, a 'New Work Item' button, and a 'Column Options' menu.

SPRINT 2:

The screenshot shows the Azure DevOps interface for the same project, 'test_project', but now displaying the 'Sprints' board for 'Sprint 2'. The left sidebar is identical to the previous screenshot. The main area shows the 'test_project Team' Sprints board for 'Sprint 2'. The board is organized into four columns: 'To Do', 'Doing', and 'Done'. The 'To Do' column contains a list of user stories, each with a checkbox and an 'Unassigned' status. The user stories are: 1. As a user, I want login functionality so that I can access my account securely. (Unassigned), 5. Design login page UI (To Do, Unassigned), 4. small work item (To Do, Unassigned), 6. Create login API (To Do, Unassigned), 7. Validate username and password (To Do, Unassigned), and 8. Test login functionality (To Do, Unassigned). The 'Doing' and 'Done' columns are currently empty. The top right of the interface includes a search bar, a 'New Work Item' button, and a 'Column Options' menu.

SPRINT 3:

The screenshot shows the Azure DevOps interface for a project named 'test_project'. The left sidebar contains navigation links: Overview, Boards, Work items, Boards, Backlogs, Sprints (selected), Queries, Delivery Plans, Analytics views, Repos, Pipelines, Test Plans, and Artifacts. The main area displays the 'Sprints' board for 'test_project Team'. The board is organized into columns: To Do, Doing, and Done. The 'To Do' column contains three items: '2 As a user, I want email verification so that I can securely login', '3 As a user, I want to reset my password so that I can recover access', and 'Test login functionality'. Each item is assigned to 'To Do' and 'Unassigned'. The board also shows a 'Collapse all' button and a 'New Work Item' button. The top right corner includes a search bar and a 'Column Options' button.

RESULT:

The sprint has been created for the project.
