

TESTING – TEST PLANS AND TEST CASES

AIM:

To create Test Plans and Test Cases in Azure DevOps for the Smart Event Management System and write test cases for major functionalities by covering both Happy Path and Error Path scenarios.

PROCEDURE:

1. Understand Core Features of the Application

- User Registration & Login
- Event Creation and Management
- Vendor Registration and Booking
- Food and Catering Arrangement
- Music and Entertainment Management
- Volunteer Registration and Assignment
- Budget Management
- Real-time Notifications

2. Define User Interactions

Each test case represents real-time user actions such as:

- Registering a new account
- Logging into the application
- Creating events
- Booking vendors
- Assigning volunteers
- Selecting food packages
- Managing music and equipment

3. Design Happy Path Test Cases

These test cases validate whether the system functions correctly under normal conditions.

- User logs in successfully
- Organizer creates an event
- Vendor booking completes successfully
- Volunteer assignment works correctly

4. Design Error Path Test Cases

These test cases validate how the system behaves under invalid or unexpected conditions.

- Invalid login credentials
- Duplicate registration
- Vendor double booking
- Empty event details
- Network/server failure

5. Break Down Steps and Expected Results

- Each test case includes:
- Step-by-step actions
- Expected outputs/results
- Type of testing scenario

6. Use Clear Naming and IDs

- TC01 – Successful Registration
- TC02 – Login Failure
- TC10 – Vendor Double Booking Error

7. Separate Test Suites

- Test cases are grouped based on functionality:
- User Authentication
- Event Management
- Vendor Management
- Catering Management
- Volunteer Management

8. Prioritize and Review

- Critical functionalities are marked as high priority.
- Test cases are reviewed for completeness and traceability.

Test Cases (1 item)

New Test Case

Title	Order	Test Case Id	Assigned To	Status
Successful User Registration	1	100	Wrench	Done

1.Test case

Give two test cases for at least five user stories showcasing the happy path and error scenarios in azure DevOps platform.

USER STORIES

- As a user, I want to register and login securely so that my account remains protected.
- As an organizer, I want to create and manage events so that event information remains accurate.
- As an organizer, I want to book vendors for food, music, and decoration so that arrangements are confirmed.
- As an organizer, I want to select food packages based on guest count so that catering is sufficient.
- As an organizer, I want to assign volunteers to event tasks so that work is distributed properly.

Test Suites

TEST SUITE: TS01 – USER REGISTRATION & LOGIN

1. TC01 – Successful User Registration

o Action:

- Open Registration page
- Enter valid username, email, and password
- Click Register

o Expected Results:

- Account is created successfully
- Verification email is sent
- User redirected to login page

o Type: Happy Path

2. TC02 – Registration with Existing Email

o Action:

- Open Registration page
- Enter already registered email
- Click Register

o Expected Results:

- Error message “Email already exists” displayed

o Type: Error Path

3. TC03 – Successful Login

- **Action:**
 - Open Login page
 - Enter valid credentials
 - Click Login
- **Expected Results:**
 - User successfully logged in
 - Dashboard displayed
- **Type:** Happy Path

4. TC04 – Login with Invalid Password

- **Action:**
 - Open Login page
 - Enter wrong password
 - Click Login
- **Expected Results:**
 - Error message “Invalid username or password” displayed
- **Type:** Error Path

Test Suit: TS02 - EVENT MANAGEMENT

1. TC05 –Create Event Successfully

- **Action:**
 - Login as organizer
 - Navigate to Create Event
 - Enter valid event details
 - Click Save
- **Expected Results:**
 - Event created successfully
 - Event details stored in database
- **Type:** Happy Path

2. TC06 – Create Event with Past Date

- **Action:**
 - Open Create Event page
 - Enter past event date
 - Click Save
- **Expected Results:** Error message “Invalid event date” displayed
- **Type:** Error Path

3. TC07 – Update Event Successfully

- **Action:**
 - Open existing event
 - Modify event details
 - Click Update
- **Expected Results:**
 - Event details updated successfully
- **Type:** Happy Path

4. TC08 – Delete Event without Confirmation

- **Action:**
 - Select Delete Event
 - Skip confirmation dialog
- **Expected Results:**
 - Event should not be deleted
 - Confirmation popup displayed
- **Type:** Error Path

Test Suit: TS03 - VENDOR MANAGEMENT

1. TC09 – Vendor Registration Successfully

- **Action:**
 - Open Vendor Registration page
 - Enter vendor details and category
 - Click Register
- **Expected Results:**
 - Open Vendor Registration page
 - Enter vendor details and category
 - Click Register
- **Type:** Happy Path

2. TC10 – Vendor Double Booking

- **Action:**
 - Book same vendor for two events at same time
- **Expected Results:**
 - Error message “Vendor already booked” displayed
- **Type:** Error Path

3. TC11 – Vendor Booking Successfully

- o **Action:**
 - Select vendor
 - Confirm booking
- o **Expected Results:**
 - Booking successful
 - Budget updated automatically
- o **Type:** Happy Path

4. TC12 – Budget Not Updated After Booking

- o **Action:**
 - Book vendor
 - Verify total event budget
- o **Expected Results:**
 - Budget updated correctly
 - Error shown if update fails
- o **Type:** Error Path

Test Suit: TS04 - FOOD & CATERING MANAGEMENT

1. TC13 – Select Food Package Successfully

- o **Action:**
 - Select food package
 - Enter guest count
 - Click Confirm
- o **Expected Results:**
 - Package selected successfully
 - Total cost calculated correctly
- o **Type:** Happy Path

2.TC14 – Invalid Guest Count

- o **Action:**
 - Enter invalid guest count
 - Click Confirm
- o **Expected Results:**
 - Error message “Invalid guest count” displayed
- o **Type:** Error Path

Test Suit: TS05 - VOLUNTEER MANAGEMENT

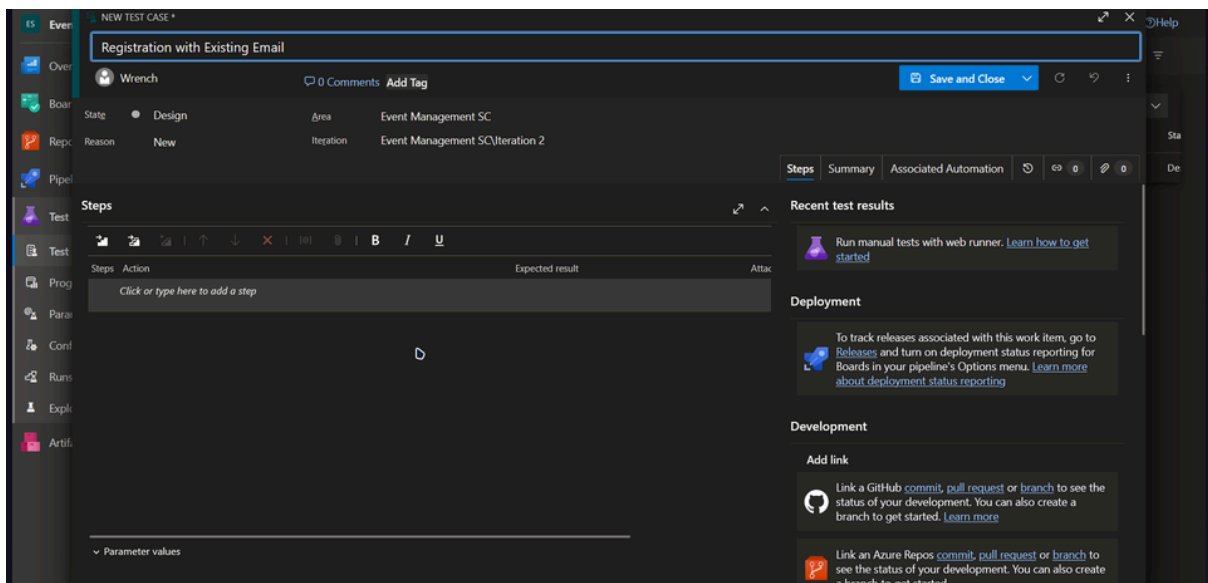

1. TC15 – Assign Volunteer Successfully

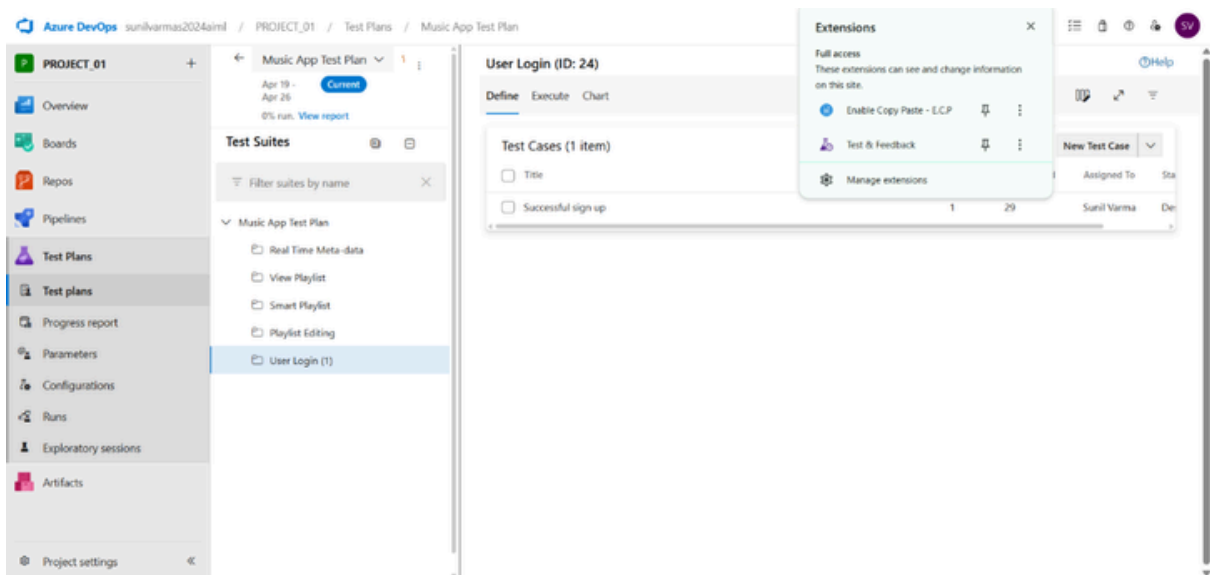

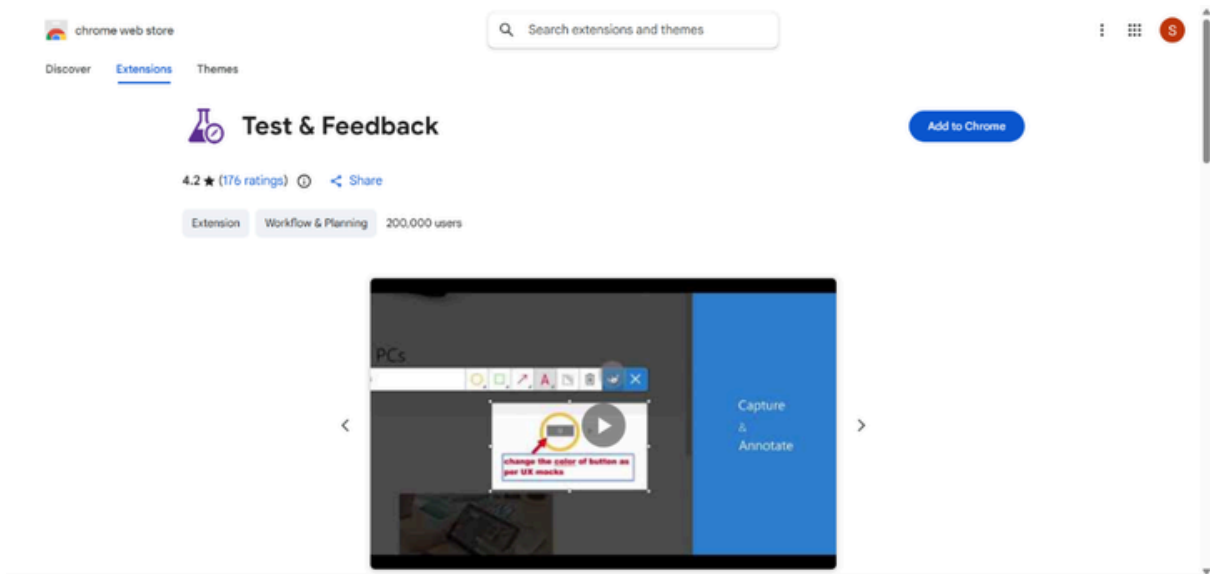

- **Action:**
 - Open volunteer assignment page
 - Assign volunteer to event task
 - Click Save
- **Expected Results:**
 - Volunteer assigned successfully
 - Notification sent
- **Type:** Happy Path

2. TC16 – Duplicate Volunteer Assignment

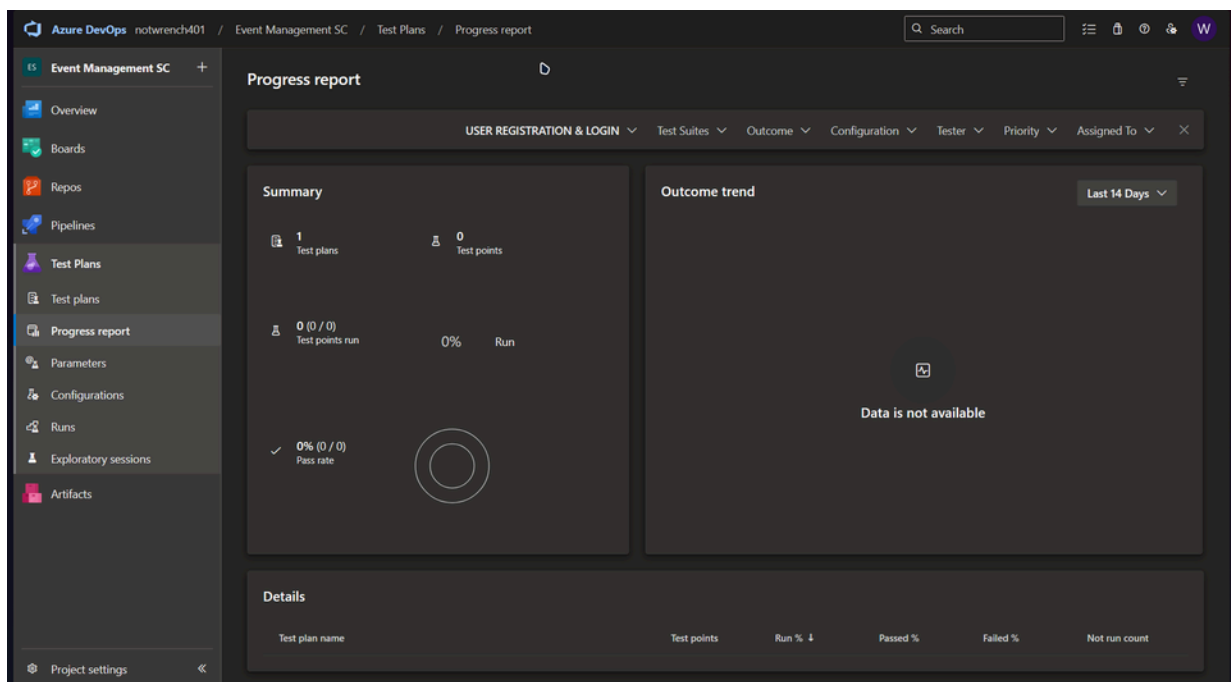

- **Action:**
 - Assign same volunteer to same task multiple times
- **Expected Results:**
 - Error message “Volunteer already assigned” displayed
- **Type:** Error Path

Test Cases

1. Progress report

Result:

The test plans and test cases for the user stories is created in Azure DevOps with Happy Path and Error Path
